- Coin Weight: 5oz
- Coin Diameter: 65 mm
- Coin Denomination: \$2.50
- Year of Issue: 2017
- Coin Mintage: 777
- Country of Issue: Cook Islands

Coin Story

The seven summits have been featured on several coin series over the years including CIT's Mountains and Flora. At the American Numismatic Association event in 2016 however, CIT launched the highly exclusive and limited "The 7 Summits" collection, which for the first time presents the seven peaks in breathtaking topographic smartminting© relief detailing every mountain and valley in five ounces of fine silver. Successor to the series initiator «Denali» will be Mount Everest, the world's highest and most famous peak. Minted in highly detailed, three-dimensional topographic relief with a refined selective color application that accentuates the mountain ridges and valleys, "Everest" is a breathtakingly beautiful and fascinating numismatic work of art.
